

RLE Solutions: the Rail Logistics Europe group's new service to support shippers in their rail logistics projects

Rail Logistics Europe, Europe's number 2 in rail logistics, has just launched RLE Solutions, a new service to help shippers decarbonize their supply chains in Europe.

RLE Solutions is the Rail Logistics Europe group's new service designed to help industries and shippers decarbonize their supply chains.

Many industrial sectors are now committed to controlling their indirect CO2 emissions, especially in their inbound and outbound transportation operations, known as "Scope 3" according to a classification recognized at European level.

Today, there is significant room for growth among current rail freight users, but even more among industries and shippers who do not yet use rail services and are looking to have a greener supply chain.

With an international team of rail transport specialists, RLE Solutions offers to:

- Simplify access to rail transportation throughout the European supply chain.
- Provide technical and economic feasibility studies for shippers' CSR, Purchasing and Supply-Chain Departments.
- Implement appropriate rail solutions using the well-known Rail Logistics Europe entities: Hexafret, Captrain, Technis, Forwardis, Naviland Cargo and VIIA.

With **RLE Solutions**, the Rail Logistics Europe group is taking a further step towards an efficient modal shift to rail, thanks to a low-carbon mode of transport.

Relying on the services and expertise of one of Europe's leading rail logistics groups (conventional rail freight from wagon to heavy rail, including wagon sets, transport of maritime containers, swap bodies or semi-trailers, "all Inc." freight forwarding services, management of the first and last mile by road, supply of transportation equipment, etc.), the RLE Solutions team acts as a one-stop-shop to simplify the interface for all shippers wishing to experiment with rail solutions.

With over 1.7 million tons of CO2 avoided in its clients' value chains by 2024, Rail Logistics Europe is one of Europe's key logistics players, helping to decarbonize shippers' supply chains.

The RLE Solutions teams will welcome you on the Rail Logistics Europe stand (N044) at the SITL trade fair from 1 to 3 April 2025 in Paris and at the Transport Logistic trade fair in Munich from 2 to 5 June 2025 (B6.209/310).

ABOUT THE RAIL LOGISTICS GROUP

Rail Logistics Europe is the SNCF Group entity dedicated to rail freight transport. With its 6 companies with complementary expertise - Hexafret, Captrain, Forwardis, VIIA, Naviland Cargo and Technis - Rail Logistics Europe offers its clients a range of personalized end-to-end services based on a unique portfolio of assets and recognized expertise in Europe. With its 9,000 employees, Rail Logistics Europe is the leading rail logistics hub in France and the 2nd largest in Europe, and is able to offer innovative, reliable and sustainable solutions in France and abroad to meet the challenges of decarbonizing freight transport.
